[39] CatherineMalin (Female): "Judging from the blood splatter on your shirt, I take it you visited my favorite cleaner?"
[349] Player: "Let's talk about something else."
[351] Player: "I'll get back to you on that."
[350] CatherineMalin (Female): "Sure."
[86] CatherineMalin (Female): "Well? I'm half-listening."
[5] Player: "The boss sent me, you oaf."
[8] Player: "That's enough for now."
[100] Player: "Actually, I'm the fixer... for your SubLight problem? "
[126] CatherineMalin (Female): "Funny. You don't look like one of Lilya's. Sure sound the part though."
[47] CatherineMalin (Female): "Good of you to finally haul your ass over here. I wired for back up weeks ago."
[264] CatherineMalin (Female): "Got something that's going to require special extraction from Cascadia."
[344] Player: "I found a passcode on a corpse in Stellar Bay. I guess it grants access to the extraction site?"
[345] CatherineMalin (Female): ""Found it on a corpse," huh? If you killed Lilya's agent, you get to explain it to her. Not me."
[346] Player: "He was dead when I got there."
[347] CatherineMalin (Female): "Well, shit. I knew he'd come to a bad end one day."
[348] CatherineMalin (Female): "Still, no time for weepin' and wailin'. We've got a metric fuckton of bits worth of salvage just waiting for extraction."
[266] Player: "Cut to the chase, Malin."
[337] Player: "Right, the Alta-Vitae stuff that Lilya mentioned."
[269] CatherineMalin (Female): "All right, all right."
[271] CatherineMalin (Female): "One of my runners uncovered a cache of Alta-Vitae Gas, left in a lab when the Board abandoned Cascadia."
[338] CatherineMalin (Female): "So you got a brain on them shoulders. Excellent. Makes my life a world easier."
[272] CatherineMalin (Female): "To extract the gas, you'll need to siphon it from the lab in Cascadia into one of your ship's fuel tanks. Totally safe."
[274] Player: "I can get it done."
[275] Player: "Are you kidding me?"
[265] Player: "Define "safe.""
[342] Player: "Remind me what Alta-Vitae Gas is, exactly."
[276] CatherineMalin (Female): "I do like your gumption. But let's not be hasty."
[277] CatherineMalin (Female): "Hold your thrusters. I ain't even got to the tricky part."
[268] CatherineMalin (Female): "Meaning safe for me and my crew. Seeing as it ain't us undertaking the risk."
[292] CatherineMalin (Female): "Do I look like one of them egghead science types? All I know is that labs use it to create plants and livestock out of local species. "
[278] CatherineMalin (Female): "To get to the gas, you'll need to navigate through the town, which is overrun by marauders."
[313] CatherineMalin (Female): "But it's a controlled commodity - available only to the Board - so it is of high value on the dark market."
[279] CatherineMalin (Female): "The lab itself has become an infested nest, crawling with manties. You got to fight through or figure some other way to exterminate 'em. Maybe the ventilation system?"
[280] Player: "No problem. Nyoka's handled mantisaurs before."
[281] Player: "Our sawbones, Ellie, could probably cook something up."
[283] Player: "I'll find a way around the mantisaurs."
[285] CatherineMalin (Female): "A sound selection. Nyoka's sturdy, reliable, and don't mind wading knee-deep into guts."
[288] CatherineMalin (Female): "I shall leave the details to you."
[291] CatherineMalin (Female): "Clever. That's why Lilya's paying you, I take it."
[287] CatherineMalin (Female): "Now, after you clear the manti-nest and reach the storage room, all that's left is to get the gas flowing into the fuel system."
[289] CatherineMalin (Female): "The task will require someone with technical skills. Or you could force it through with a plasma overload. Don't recommend that option though. Unless you want to get dead."
[295] Player: "The plasma option sounds fun."
[296] Player: "Better do this safely. I've only got one ship."
[301] CatherineMalin (Female): "Shall I inscribe that on your tombstone, as well?"
[302] CatherineMalin (Female): "And I'd rather not wait another several weeks for Lilya to send your replacement."
[303] CatherineMalin (Female): "Once you've got our goods, take 'em to the Groundbreaker. Lilya's fencers ought to handle the rest of it."
[336] CatherineMalin (Female): "I've marked the coordinates for you to the lab in Cascadia. Use the passcode ANTEDILUVIAN on the terminal to get in."
[306] CatherineMalin (Female): "Best of luck, fixer."
