Table of Contents

Preface

Cristina Bosco, Piero Cosi, Felice Dell’Orletta, Mauro Falcone, Simonetta Montemagni and Maria Simi

The Evalita 2014 Dependency Parsing task

Cristina Bosco, Felice Dell’Orletta, Simonetta Montemagni, Manuela Sanguinetti and Maria Simi
1

Dependency Parsing Techniques for Information Extraction

Giuseppe Attardi and Maria Simi 9

Comparing State-of-the-art Dependency Parsers for the EVALITA 2014 Dependency Parsing Task

Alberto Lavelli 15

Testing parsing improvements with combination and translation in Evalita 2014

Alessandro Mazzei 21

EVENTI: Evaluation of Events and Temporal Information at Evalita 2014

Tommaso Caselli, Rachele Sprugnoli, Manuela Speranza and Monica Monachini 27

Experiments in Identification of Italian Temporal Expressions

Giuseppe Attardi and Luca Baronti 35

HeidelTime at EVENTI: Tuning Italian Resources and Addressing TimeML’s Empty Tags

Giulio Manfredi, Jannik Strötgen, Julian Zell and Michael Gertz 39

FBK-HLT-time: a complete Italian Temporal Processing system for EVENTI-Evalita 2014

Paramita Mirza and Anne-Lyse Minard 44

Overview of the Evalita 2014 SENTiment POLarity Classification Task

Valerio Basile, Andrea Bolioli, Malvina Nissim, Viviana Patti and Paolo Rosso 50

UNIBA at EVALITA 2014-SENTIPOLC Task: Predicting tweet sentiment polarity combining micro-blogging, lexicon and semantic features

Pierpaolo Basile and Nicole Novielli 58

ITGETARUNS A Linguistic Rule-Based System for Pragmatic Text Processing

Rodolfo Delmonte 64

Subjectivity, Polarity And Irony Detection: A Multi-Layer Approach

Elisabetta Fersini, Enza Messina and Federico Alberto Pozzi 70

IRADABE: Adapting English Lexicons to the Italian Sentiment Polarity Classification task

Irazú Hernández Farias, Davide Buscaldi and Belém Priego Sánchez 75

Linguistically-motivated and Lexicon Features for Sentiment Analysis of Italian Tweets

Andrea Cimino, Stefano Cresci, Felice Dell’Orletta and Maurizio Tesconi 81

The CoLing Lab system for Sentiment Polarity Classification of tweets

Lucia C. Passaro, Gianluca E. Leboni, Laura Pollacci, Emmanuele Chersoni and Alessandro Lenci
87

The FICLIT+CS@UniBO System at the EVALITA 2014 Sentiment Polarity Classification Task

Pierluigi Di Gennaro, Arianna Rossi and Fabio Tamburini 93

<i>A Multiple Kernel Approach for Twitter Sentiment Analysis in Italian</i>	
Giuseppe Castellucci, Danilo Croce, Diego De Cao and Roberto Basili	98
<i>Relying on intrinsic word features to characterise subjectivity, polarity and irony of Tweets</i>	
Francesco Barbieri, Francesco Ronzano and Horacio Saggion	104
<i>Self-Evaluating Workflow for Language-Independent Sentiment Analysis</i>	
Arseni Anisimovich	108
<i>EVALITA 2014: Emotion Recognition Task (ERT)</i>	
Antonio Origlia and Vincenzo Galatà	112
<i>A Preliminary Application of Echo State Networks to Emotion Recognition</i>	
Claudio Gallicchio and Alessio Micheli	116
<i>Emotion Recognition with a Kernel Quantum Classifier</i>	
Fabio Tamburini	120
<i>Forced Alignment on Children Speech</i>	
Piero Cosi, Francesco Cutugno, Vincenzo Galatà and Antonio Origlia	124
<i>The SPPAS participation to Evalita 2014</i>	
Brigitte Bigi	127
<i>Human and Machine Language / Dialect Identification from Natural Speech and Artificial Stimuli: a Pilot Study with Italian Listeners</i>	
Antonio Romano and Claudio Russo	131
<i>SASLODOM: Speech Activity detection and Speaker LOralization in DOMestic environments</i>	
Alessio Brutti, Mirco Ravanelli and Maurizio Omologo	139
<i>The L2F system for the EVALITA-2014 speech activity detection challenge in domestic environments</i>	
Alberto Abad, Miguel Matos, Hugo Meinedo, Ramon F. Astudillo and Isabel Trancoso	147
<i>Neural Networks Based Methods for Voice Activity Detection in a Multi-room Domestic Environment</i>	
Giacomo Ferroni, Roberto Bonfigli, Emanuele Principi, Stefano Squartini and Francesco Piazza	153
