Introduction

Welcome to the 3rd Workshop on Narrative Understanding!

This is the 3rd iteration of the workshop, which brings together an **interdisciplinary** group of researchers from AI, ML, NLP, Computer Vision and other related fields, as well as scholars from the humanities to discuss **methods to improve automatic narrative understanding capabilities**.

We are happy to present 10 papers on this topic (along with 3 non-archival papers to be presented only at the workshop). These papers take on the complex challenges presented by diverse texts in areas of film, dialogue and literature as they look to improve methods for event extraction, gender and representation bias, controllable generation, quality assessment, and other tasks related to the workshop theme. We would like to thank everyone who submitted their work to this workshop and the program committee for their helpful feedback.

We would also like to thank our invited speakers for their participation in this workshop: David Bamman, Nate Chambers, Nasrin Mostafazadeh, Nanyun Peng, Laure Thompson, and Prashant Pandey.

Elizabeth, Faeze, Lara, Mohit, Nader and Snigdha

Organizers:

Nader Akoury, University of Massachusetts Amherst
Faeze Brahman, University of California, Santa Cruz
Snigdha Chaturvedi, University of North Carolina, Chapel Hill
Elizabeth Clark, University of Washington
Mohit Iyyer, University of Massachusetts Amherst
Lara J. Martin, Georgia Institute of Technology

Program Committee:
