Introduction

The International Conference on Spoken Language Translation (IWSLT) is the premiere annual scientific conference for the study, development and evaluation of spoken language translation technology. Launched in 2004 and spun out from the C-STAR speech translation consortium before it (1992-2003), IWSLT is the main venue for scientific exchange on all topics related to speech-to-text translation, speech-to-speech translation, simultaneous and consecutive translation, speech dubbing, cross-lingual communication including all multimodal, emotional, paralinguistic, and stylistic aspects and their applications in the field. The conference organizes evaluations around challenge areas, and presents scientific papers and system descriptions.

This year, IWSLT features eight shared tasks: (i) Simultaneous speech translation, (ii) Offline speech translation, (iii) Speech to speech translation, (iv) Low-resource speech translation, (v) Multilingual speech translation, (vi) Dialect speech translation, (vii) Formality control for spoken language translation, (viii) Isometric spoken language translation. These topics represent open problems toward effective cross-lingual communication and we expect the community effort and discussion will greatly advance the state of the field. Each shared task was coordinated by one or more chairs. The resulting evaluation campaigns attracted a total of 27 teams, from academia, research centers and industry. System submissions resulted in system papers that will be presented at the conference. Following our call for papers, this year 44 submissions were received. In a blind review process, 9 research papers were selected out of 18 for oral presentation (50%) in addition to 25 system papers.

The program committee is excited about the quality of the accepted papers and expects lively discussion and exchange at the conference. The conference chairs and organizers would like to express their gratitude to everyone who contributed and supported IWSLT. In particular, we wish to thank our Diamond sponsors and donors Apple, AWS, Meta and Zoom, our Platinum sponsor Microsoft, and our Bronze sponsor AppTek. We thank the shared tasks chairs, organizers, and participants, the program chair and committee members, as well as all the authors that went the extra mile to submit system and research papers to IWSLT, and make this year’s conference a most vibrant event. We also wish to express our sincere gratitude to ACL for hosting our conference and for arranging the logistics and infrastructure that allow us to hold IWSLT 2022, for the first time, as a hybrid conference.

Welcome to IWSLT 2022 wherever you are joining us in person, in Dublin, or remotely!

Marcello Federico and Alex Waibel, Conference Chairs
Organizing Committee

Conference Chairs
    Marcello Federico, AWS AI Labs, USA
    Alex Waibel, CMU, USA

Program Chair
    Marta Costa-jussà, Meta AI, France

Evaluation Chairs
    Sebastian Stüker, KIT, Germany
    Jan Niehues, KIT, Germany

Website and Publication Chair
    Elizabeth Salesky, JHU, USA
Program Committee

Duygu Ataman, University of Zurich, Switzerland
Nguyen Bach, Alibaba, USA
Laurent Besacier, IMAG, France
Anna Currey, AWS AI Labs, USA
Mattia Di Gangi, AppTek, Germany
Georgiana Dinu, AWS AI Labs, Germany
Akiko Eriguchi, Microsoft, USA
Carlos Escolano, Universitat Politècnica de Catalunya, Spain
Markus Freitag, Google, USA
Gerard I. Gallego, Universitat Politècnica de Catalunya, Spain
Cuong Hoang, AWS AI Labs, USA
Matthias Huck, LMU, Germany
Hirofumi Inaguma, Kyoto University, Japan
Takatomo Kano, Nara Institute of Science and Technology, Japan
Yves Lepage, U. Waseda, Japan
Yuchen Liu, Princeton, USA
Xutai Ma, Johns Hopkins University, USA
Evgeny Matusov, AppTek, Germany
Surafel Melaku Lakew, Amazon AI, USA
Maria Nadejde, AWS AI Labs, USA
Matteo Negri, FBK, Italy
Juan Pino, Meta AI, USA
Raghavendra Pappagari, AWS AI Labs, USA
Julian Salazar, Amazon AWS AI, USA
Elizabeth Salesky, Johns Hopkins University, USA
Matthias Sperber, Apple, USA
Sebastian Stüker, Karlsruhe Institute of Technology, Germany
Katsuhito Sudoh, NAIST, Japan
Yun Tang, Meta AI, USA
Brian Thompson, AWS AI Labs, USA
Ioannis Tsiamas, Universitat Politècnica de Catalunya, Spain
Marco Turchi, FBK, Italy
David Vilar, Google, Germany
Changhan Wang, Meta AI, USA
Chengyi Wang, Nankai University, China
Krzystof Wolk, Polish-Japanese Academy of Information Technology, Poland

Invited Speakers

Frederic Chaume, Universitat Jaume I
Keynote Talk: Synchronization in translation for dubbing: implications for its automation

Frederic Chaume
Universitat Jaume I

Abstract: Synchronization (or lip-sync, also spelled lip-synch) is one of the key factors in audiovisual translation, especially in the context of dubbing. Although it is often considered as the distinguishing feature of dubbing, it is only one of several important aspects such as the ‘natural’ reproduction of a pre-fabricated oral discourse or the translation problems posed by the interaction between image and word. If we take a look at the research on lip-sync, it is regarded as an urgent, vital issue, as can be seen from the wide range of publications on the subject. Beyond doubt synchronization has a direct impact on the translation process and product, and as such, puts all the translator’s creative skills to the test. Dubbing is a well-known example of the invisibility of translation, an artistic and technical exercise that intentionally replaces the original dialogue track with a new track on which target language (TL) dialogue exchanges are recorded. In contrast to voice-over for example, the emphasis in dubbing lies in matching the translation to the silent mouths of the original actors. The result is that viewers watch and hear foreign actors speaking in the viewers’ own language, a paradox which has been naturally accepted in all dubbing countries. This talk will deal with the definition and scope of synchronization in the audiovisual translation field, will explain the three main synchronization types, will tackle issues related to different language pairs combinations and will present the last efforts carried out by some start-ups and research groups to automate this technical and artistic process. The talk will be illustrated with clips from films and TV series dubbed into six different languages.

Bio: Frederic Chaume is a Full Professor of Audiovisual Translation at Universitat Jaume I (Spain), where he teaches audiovisual translation theory and translation and adaptation for dubbing; and Honorary Professor at University College London (UK), where he teaches translation and adaptation for voice-over and dubbing, Universidad Ricardo Palma (Perú) and Universidad Peruana de Ciencias Aplicadas (Perú). He is author of eight books and has also coedited two books and three special journal issues (Textus, Perspectives, Prosopopeya). He is the director of the TRAMA book series (Publicacions de la Universitat Jaume I), the first collection of monographs on audiovisual translation and media localization. Prof. Chaume has published over 100 articles, book chapters and encyclopedic entries on audiovisual translation and has given numerous keynote lectures on this topic in international translation studies conferences and in several European and American universities. He also teaches regularly in some of them (University College London-UK, Universidad de Granada-Spain, Università di Torino-Italy, among others). He has supervised or co-supervised 20 PhD theses on the topic of audiovisual translation and some of them have received different Spanish and European awards. He is also in close contact with the industry, serves as a consultant for Netflix and has signed several research agreements with different stakeholders of the media localization sector. He coordinates the research group TRAMA (www.trama.uki.es) and is the recipient of the Berlanga Award (2010), the Xènia Martínez Award (2016) and the Jan Ivarsson’s Award (2020) for his constant and enthusiastic support to media localization as well as his constant university training in this field.
# Table of Contents

## Scientific Papers:

**SubER - A Metric for Automatic Evaluation of Subtitle Quality**  
Patrick Wilken, Panayota Georgakopoulou and Evgeny Matusov ................................. 1

**Improving Arabic Diacritization by Learning to Diacritize and Translate**  
Brian Thompson and Ali Alshehri ............................................................................. 11

**Simultaneous Neural Machine Translation with Prefix Alignment**  
Yasumasa Kano, Katsuhito Sudoh and Satoshi Nakamura ................................. 22

**Locality-Sensitive Hashing for Long Context Neural Machine Translation**  
Frithjof Petrick, Jan Rosendahl, Christian Herold and Hermann Ney ...................... 32

**Anticipation-Free Training for Simultaneous Machine Translation**  
Chih-Chiang Chang, Shun-Po Chuang and Hung-yi Lee ........................................... 43

**Who Are We Talking About? Handling Person Names in Speech Translation**  
Marco Gaido, Matteo Negri and Marco Turchi ..................................................... 62

**Joint Generation of Captions and Subtitles with Dual Decoding**  
Jitao Xu, François Buet, Josep Crego, Elise Bertin-Lemée and François Yvon ............ 74

**MirrorAlign: A Super Lightweight Unsupervised Word Alignment Model via Cross-Lingual Contrastive Learning**  
Di Wu, Liang Ding, Shuo Yang and Mingyang Li ...................................................... 83

**On the Impact of Noises in Crowd-Sourced Data for Speech Translation**  
Siqi Ouyang, Rong Ye and Lei Li ........................................................................... 92

## Evaluation Campaign:

**Findings of the IWSLT 2022 Evaluation Campaign**  

**The YiTrans Speech Translation System for IWSLT 2022 Offline Shared Task**  
Ziqiang Zhang and Junyi Ao ........................................................................... 158

**Amazon Alexa AI’s System for IWSLT 2022 Offline Speech Translation Shared Task**  
Akshaya Vishnu Kudlu Shanbhogue, Ran Xue, Ching-Yun Chang and Sarah Campbell 169

**Efficient yet Competitive Speech Translation: FBK@IWSLT2022**  
Marco Gaido, Sara Papi, Dennis Fucci, Giuseppe Fiameni, Matteo Negri and Marco Turchi . 177
Effective combination of pretrained models - KIT@IWSLT2022
Ngoc-Quan Pham, Tuan Nam Nguyen, Thai-Binh Nguyen, Danni Liu, Carlos Mullov, Jan Niehues and Alexander Waibel ................................................................. 190

The USTC-NELSLIP Offline Speech Translation Systems for IWSLT 2022
Weitai Zhang, Zhongyi Ye, Haitao Tang, Xiaoxi Li, Xinyuan Zhou, Jing Yang, Jianwei Cui, Dan Liu, Junhua Liu and Lirong Dai ......................................................... 198

The AISP-SJTU Simultaneous Translation System for IWSLT 2022
Qinpei Zhu, Renshou Wu, Guangfeng Liu, Xinyu Zhu, Xingyu Chen, Yang Zhou, Qingliang Miao, Rui Wang and Kai Yu ................................................................. 208

The Xiaomi Text-to-Text Simultaneous Speech Translation System for IWSLT 2022
Bao Guo, Mengge Liu, Wen Zhang, Hexuan Chen, Chang Mu, Xiang Li, Jianwei Cui, Bin Wang and Yuhang Guo ................................................................. 216

NVIDIA NeMo Offline Speech Translation Systems for IWSLT 2022
Oleksii Hrinchuk, Vahid Noroozi, Ashwinkumar Ganesan, Sarah Campbell, Sandeep Subramanian, Somshubra Majumdar and Oleksii Kuchaiev ............................................. 225

The NiuTrans’s Submission to the IWSLT22 English-to-Chinese Offline Speech Translation Task
Yuhao Zhang, Canan Huang, Chen Xu, Xiaoping Liu, Bei Li, Anxiang Ma, Tong Xiao and Jingbo Zhu ................................................................. 232

The HW-TSC’s Offline Speech Translation System for IWSLT 2022 Evaluation
Minghan Wang, Jiaxin Guo, Xiaosong Qiao, Yuxia Wang, Daimeng Wei, Chang Su, Yimeng Chen, Min Zhang, Shimin Tao, Hao Yang and Ying Qin ............................................. 239

The HW-TSC’s Simultaneous Speech Translation System for IWSLT 2022 Evaluation
Minghan Wang, Jiaxin Guo, Yinglu Li, Xiaosong Qiao, Yuxia Wang, Zongyao Li, Chang Su, Yimeng Chen, Min Zhang, Shimin Tao, Hao Yang and Ying Qin ............................................. 247

MLLP-VRAIN UPV systems for the IWSLT 2022 Simultaneous Speech Translation and Speech-to-Speech Translation tasks
Javier Iranzo-Sánchez, Javier Jorge Cano, Alejandro Pérez-González-de-Martos, Adrián Giménez Pastor, Gonçal V. Garcés Díaz-Munio, Pau Baquero-Arnal, Joan Albert Silvestre-Cerdà, Jorge Civera Saiz, Albert Sanchis and Alfons Juan ................................................................. 255

Pretrained Speech Encoders and Efficient Fine-tuning Methods for Speech Translation: UPC at IWSLT 2022
Ioannis Tsiamas, Gerard I. Gállego, Carlos Escolano, José A. R. Fonollosa and Marta R. Costa-jussà ................................................................. 265

CUNI-KIT System for Simultaneous Speech Translation Task at IWSLT 2022
Peter Polák, Ngoc-Quan Pham, Tuan Nam Nguyen, Danni Liu, Carlos Mullov, Jan Niehues, Ondřej Bojar and Alexander Waibel ................................................................. 277

NAIST Simultaneous Speech-to-Text Translation System for IWSLT 2022
Ryo Fukuda, Yuka Ko, Yasumasa Kano, Kosuke Doi, Hirotaka Tokuyama, Sakriani Sakti, Katsuhito Sudoh and Satoshi Nakamura ................................................................. 286

The HW-TSC’s Speech to Speech Translation System for IWSLT 2022 Evaluation
Jiaxin Guo, Yinglu Li, Minghan Wang, Xiaosong Qiao, Yuxia Wang, Hengchao Shang, Chang Su, Yimeng Chen, Min Zhang, Shimin Tao, Hao Yang and Ying Qin ................................................................. 293
