Introduction

The 7th Workshop on Representation Learning for NLP (RepL4NLP 2022) will be hosted by ACL 2022 and held on 26 May 2022. The workshop is being organised by Spandana Gella, He He, Burcu Can, Maximilian Mozes, Eleonora Giunchiglia, Sewon Min, Samuel Cahyawijaya, Xiang Lorraine Li and Bodhisattwa Prasad Majumder; and advised by Isabelle Augenstein, Anna Rogers, Kyunghyun Cho, Edward Grefenstette, Chris Dyer and Laura Rimell. The workshop is organised by the ACL Special Interest Group on Representation Learning (SIGREP).

The 7th Workshop on Representation Learning for NLP aims to continue the success of the Repl4NLP workshop series, with the 1st Workshop on Representation Learning for NLP having received about 50 submissions and over 250 attendees – the second most attended collocated event at ACL’16 after WMT. The workshop was introduced as a synthesis of several years of independent *CL workshops focusing on vector space models of meaning, compositionality, and the application of deep neural networks and spectral methods to NLP. It provides a forum for discussing recent advances on these topics, as well as future research directions in linguistically motivated vector-based models in NLP. The workshop will take place in a hybrid setting, and, as in previous years, feature interdisciplinary keynotes, paper presentations, posters, as well as a panel discussion.
Organizing Committee

Workshop Organizers

Spandana Gella, Amazon AI  
He He, New York University  
Bodhisattwa Prasad Majumder, University of California San Diego  
Burcu Can, University of Wolverhampton  
Eleonora Giunchiglia, University of Oxford  
Samuel Cahyawijaya, Hong Kong University of Science and Technology  
Sewon Min, University of Washington  
Maximilian Mozes, University College London  
Xiang Lorraine Li, University of Massachusetts Amherst

Senior Advisors

Isabelle Augenstein, University of Copenhagen  
Anna Rogers, University of Copenhagen  
Kyunghyun Cho, New York University  
Edward Grefenstette, Facebook AI Research  
Laura Rimell, DeepMind  
Chris Dyer, DeepMind
Program Committee

Aleksandr Drozd, RIKEN
Ankur Padia, University of Maryland, Baltimore County
Anna Tiginova, Saarland Informatics Campus, Max-Planck Institute
Ashutosh Modi, IIT Kanpur
Daichi Mochihashi, The Institute of Statistical Mathematics
Dong Zhou, Hunan University of Science and Technology
Eraldo Rezende Fernandes, Leuphana Universität Lüneburg
Federico Bianchi, Bocconi University
Frank Rudzicz, University of Toronto
Hai Wang, JD Finance America Corp
Haiqin Yang, International Digital Economy Academy
Hong Yu, Apple
Hongyu Gong, Facebook
Imed Zitouni, Google
Izzeddin Gur, Google
Jey Han Lau, The University of Melbourne
Jingjing Xu, Peking University
John P. Lalor, University of Notre Dame
Kang Min Yoo, NAVER
Kimberly Mai, University College London, University of London
Lijun Wu, Microsoft Research
Lili Mou, University of Alberta
Lin Chen, University of Illinois at Chicago
Mareike Hartmann, German Research Center for AI
Matthieu Labeau, Télécom ParisTech
Menno van Zaanen, North-West University
Minhao Cheng, Hong Kong University of Science and Technology
Mladen Karan, Queen Mary University London
Muhammad Abdul-Mageed, University of British Columbia
Nadi Tomeh, Université Sorbonne Paris Nord
Nicholas Andrews, Johns Hopkins University
Peng Qi, JD AI Research
Pranava Madhyastha, City, University of London
Qinliang Su, SUN YAT-SEN UNIVERSITY
Robin Jia, University of Southern California
Rodrigo Wilkens, UCL
Sergey Feldman, Allen Institute for Artificial Intelligence
Shankar Kumar, Google
Shuai Tang, Amazon Web Services
Sneha Mehta, Virginia Tech
Sung Ju Hwang, Korea Advanced Institute of Science and Technology
Surangika Ranathunga, University of Moratuwa
Tao Li, School of Computing, University of Utah
Tingting Mu, University of Manchester
Tsuyoshi Okita, Kyushu Institute of Technology
Tsvetomila Mihaylova, Instituto de Telecomunicações, Portugal
Vipul Raheja, Grammarly
Vladimir Eidelman, FiscalNote, Inc.
Xia Cui, University of Manchester
Yitong Li, Huawei Technologies Co., Ltd.
Yue Chen, Microsoft

Invited Speakers

Been Kim, Google Brain
Emma Strubell, Carnegie Mellon University
Monojit Choudhury, Microsoft Research, India
Percy Liang, Stanford University
Sebastian Riedel, University College London and Facebook AI Research
Table of Contents

Distributionally Robust Recurrent Decoders with Random Network Distillation  
Antonio Valerio Miceli Barone, Alexandra Birch and Rico Sennrich ................................. 1

Q-Learning Scheduler for Multi Task Learning Through the use of Histogram of Task Uncertainty  
Kourosh Meshgi, Maryam Sadat Mirzaei and Satoshi Sekine ................................. 9

PARADISE: Exploiting Parallel Data for Multilingual Sequence-to-Sequence Pretraining  
Machel Reid and Mikel Artetxe ................................................................. 20

When does CLIP generalize better than unimodal models? When judging human-centric concepts  
Romain Bielawski, Benjamin Devillers, Tim Van De Cruys and Rufin Vanrullen .......... 29

From Hyperbolic Geometry Back to Word Embeddings  
Zhenisbek Assylbekov, Sultan Nurmuhamedov, Arsen Sheverdin and Thomas Mach .... 39

A Comparative Study of Pre-trained Encoders for Low-Resource Named Entity Recognition  
Yuxuan Chen, Jonas Mikkelsen, Arne Binder, Christoph Alt and Leonhard Hennig ....... 46

Clozer: Adaptable Data Augmentation for Cloze-style Reading Comprehension  
Holy Lovenia, Bryan Wilie, Willy Chung, Zeng Min, Samuel Cahyawijaya, Dan Su and Pascale Fung ................................................................. 60

Analyzing Gender Representation in Multilingual Models  
Hila Gonen, Shauli Ravfogel and Yoav Goldberg ..................................................... 67

Detecting Textual Adversarial Examples Based on Distributional Characteristics of Data Representations  
Na Liu, Mark Dras and Wei Emma Zhang ................................................................. 78

A Vocabulary-Free Multilingual Neural Tokenizer for End-to-End Task Learning  
Md Mofijul Islam, Gustavo Aguilar, Pragaash Ponnusamy, Clint Solomon Mathialagan, Chengyuan Ma and Chenlei Guo ................................................................. 91

Identifying the Limits of Cross-Domain Knowledge Transfer for Pretrained Models  
Zhengxuan Wu, Nelson F. Liu and Christopher Potts .................................................. 100

Temporal Knowledge Graph Reasoning with Low-rank and Model-agnostic Representations  
Ioannis Dikeoulias, Saadullah Amin and Günter Neumann ......................................... 111

ANNA: Enhanced Language Representation for Question Answering  
Changwook Jun, Hansol Jang, Myoseop Sim, Hyun Kim, Jooyoung Choi, Kyungkoo Min and Kyunghoon Bae ................................................................. 121

Isomorphic Cross-lingual Embeddings for Low-Resource Languages  
Sonal Sannigrahi and Jesse Read ................................................................. 133

Video Language Co-Attention with Multimodal Fast-Learning Feature Fusion for VideoQA  
Adnen Abdessaied, Ekta Sood and Andreas Bulling .................................................. 143

Detecting Word-Level Adversarial Text Attacks via SHapley Additive exPlanations  
Edoardo Mosca, Lukas Huber, Marc Alexander Kühn and Georg Groh .......................... 156

Binary Encoded Word Mover’s Distance  
Christian Johnson ................................................................................................. 167
Unsupervised Geometric and Topological Approaches for Cross-Lingual Sentence Representation and Comparison
Shaked Haim Meirom and Omer Bobrowski .......................................................... 173

A Study on Entity Linking Across Domains: Which Data is Best for Fine-Tuning?
Hassan Soliman, Heike Adel, Mohamed H. Gad-Elrab, Dragan Milchevski and Jannik Strötgen 184

TRAttack: Text Rewriting Attack Against Text Retrieval
Junshuai Song, Jiangshan Zhang, Jifeng Zhu, Mengyun Tang and Yong Yang ............... 191

On the Geometry of Concreteness
Christian Wartena ................................................................. 204

PALBERT: Teaching ALBERT to Ponder
Daniil Gavrilov and Nikita Balagansky .............................................................. 213

Towards Improving Selective Prediction Ability of NLP Systems
Neeraj Varshney, Swaroop Mishra and Chitta Baral ........................................... 221

On Target Representation in Continuous-output Neural Machine Translation
Evgeniiia Tokarchuk and Vlad Niculae .............................................................. 227

Zero-shot Cross-lingual Transfer is Under-specified Optimization
Shijie Wu, Benjamin Van Durme and Mark Dredze ............................................. 236

Same Author or Just Same Topic? Towards Content-Independent Style Representations
Anna Wegmann, Marijn Schraagen and Dong Nguyen ......................................... 249

WeaNF: Weak Supervision with Normalizing Flows
Andreas Stephan and Benjamin Roth ............................................................... 269
