Introduction

It is our great pleasure to welcome you to the Seventh Workshop on e-Commerce and NLP (ECNLP).

This workshop focuses on intersection of Natural Language Processing (NLP) and e-Commerce. NLP and information retrieval (IR) have been powering e-Commerce applications since the early days of the fields. Today, NLP and IR already play a significant role in e-Commerce tasks, including product search, recommender systems, product question answering, machine translation, sentiment analysis, product description and review summarization, and customer review processing. With the exploding popularity of chatbots and shopping assistants — both text- and voice-based — NLP, IR, question answering, and dialogue systems research is poised to transform e-Commerce once again.

The ECNLP workshop series was designed to provide a venue for the dissemination of late-breaking research results and ideas related to e-commerce and online shopping, as well as a forum where new and unfinished ideas could be discussed. This is the seventh edition of the workshop since its inception in 2019.

We have received a larger number of submissions than we could accept for presentation, (55% acceptance rate). The selection process was competitive and we believe it resulted in a balanced and varied program that is appealing to audiences from the various sub-areas of e-Commerce.

We would like to thank everyone who submitted a paper to the workshop. We would also like to express our gratitude to the members of the Program Committee for their timely reviews, and for supporting the tight schedule by providing reviews at short notice.

We hope that you enjoy the workshop!

Table of Contents

Learning Reasons for Product Returns on E-Commerce Miriam Farber, Slava Novgorodov and Ido Guy
Towards Multi-Modal Co-Reference Resolution in Conversational Shopping Agents Samuel Osebe, Prashan Wanigasekara, Thomas Gueudre, Thanh Tran, Rahul Sharma, Fan Yang, Qian Hu, Weitong Ruan, Emre Barut and Chengwei Su
Efficient and Interpretable Information Retrieval for Product Question Answering with Hetero-
geneous Data Biplob Biswas and Rajiv Ramnath19
Hallucination Detection in LLM-enriched Product Listings Ling Jiang, Keer Jiang, Xiaoyu Chu, Saaransh Gulati and Pulkit Garg29
Self-Improving Customer Review Response Generation Based on LLMs Guy Azov, Tatiana Pelc, Adi Fledel Alon and Gila Kamhi
Don't Just Translate, Summarize Too: Cross-lingual Product Title Generation in E-commerce Bryan Zhang, Taichi Nakatani, Daniel Vidal Hussey, Stephan Walter and Liling Tan 58
Turkish Typo Correction for E-Commerce Search Engines Elif Oral, Koray Mancuhan, Hüseyin Varol Erdem and Pınar Ece Hatipoglu65
Detecting AI-enhanced Opinion Spambots: a study on LLM-generated Hotel Reviews Davide Buscaldi and Vijini Liyanage74
Assessing Image-Captioning Models: A Novel Framework Integrating Statistical Analysis and Metric Patterns
Qiaomu Li, Ying Xie, Nina Grundlingh, Varsha Rani Chawan and Cody Wang79
Frogs into princes: A generative model to understand the success of product descriptions Takehiro Takayanagi, Bruno Charron and Marco Visentini-Scarzanella88
STA: Self-controlled Text Augmentation for Improving Text Classifications Congcong Wang, Gonzalo Fiz Pontiveros, Steven Derby and Tri Kurniawan Wijaya 97
Multi-word Term Embeddings Improve Lexical Product Retrieval Viktor Shcherbakov and Fedor Krasnov
Explicit Attribute Extraction in e-Commerce Search
Robyn Loughnane, Jiaxin Liu, Zhilin Chen, Zhiqi Wang, Joseph Giroux, Tianchuan Du, Benjamin Schroeder and Weiyi Sun
TAAL: Target-Aware Active Learning Kunal Kotian, Indranil Bhattacharya, Shikhar Gupta, Kaushik Pavani, Naval Bhandari and Sunny Dasgupta
Cluster Language Model for Improved E-Commerce Retrieval and Ranking: Leveraging Query
Similarity and Fine-Tuning for Personalized Results Duleep Rathgamage Don, Ying Xie, Le Yu, Simon Hughes and Yun Zhu145
