Message from the Tutorial Chairs

Welcome to the Tutorials Session of LREC–COLING 2024.

The tutorials are organized to give conference attendees a comprehensive overview by experts on topics relevant to our field. As a novelty, we did not only ask for proposals that are cutting edge or introductory to a topic, but also requested proposals for adjacent research areas in recognition of the interdisciplinary nature of the field.

We received 20 submissions from which we selected 13 to be taught at the conference. Out of those three are introductory (one to an adjacent topic), and the majority present cutting-edge topics. Unsurprisingly, a popular topic is large-language models, which are covered by multiple tutorials with varying perspectives on multimodality, evaluation, knowledge editing and control, hallucination, and bias. Other tutorials cover argument mining, semantic web, dialogue systems, semantic parsing, inclusion in NLP systems, and applications in chemistry.

Our thanks go to the conference organizers for effective collaboration, and in particular to the general chairs Nicoletta Calzolari and Min-Yen Kan and the publication chairs Francis Bond and Alexandre Rademaker.

We hope you enjoy the tutorials.

LREC–COLING 2024 Tutorial Co-chairs

- Naoaki Okazaki
- Roman Klinger

Table of Contents

<i>From Multimodal LLM to Human-level AI: Modality, Instruction, Reasoning, Efficiency and beyond</i>	
Hao Fei, Yuan Yao, Zhuosheng Zhang, Fuxiao Liu, Ao Zhang and Tat-Seng Chua	1
<i>Geo-Cultural Representation and Inclusion in Language Technologies</i>	
Sunipa Dev and Rida Qadri	9
<i>Meaning Representations for Natural Languages: Design, Models and Applications</i>	
Julia Bonn, Jeffrey Flanigan, Jan Hajič, Ishan Jindal, Yunyao Li and Nianwen Xue	13
<i>Navigating the Modern Evaluation Landscape: Considerations in Benchmarks and Frameworks for Large Language Models (LLMs)</i>	
Leshem Choshen, Ariel Gera, Yotam Perlitz, Michal Shmueli-Scheuer and Gabriel Stanovsky	19
<i>Mining, Assessing, and Improving Arguments in NLP and the Social Sciences</i>	
Gabriella Lapesa, Eva Maria Vecchi, Serena Villata and Henning Wachsmuth	26
<i>Knowledge Editing for Large Language Models</i>	
Ningyu Zhang, Yunzhi Yao and Shumin Deng	33
<i>The DBpedia Databus Tutorial: Increase the Visibility and Usability of Your Data</i>	
Milan Dojchinovski	42
<i>NLP for Chemistry – Introduction and Recent Advances</i>	
Camilo Thorne and Saber Akhondi	45
<i>Formal Semantic Controls over Language Models</i>	
Danilo Silva de Carvalho, Yingji Zhang and André Freitas	50
<i>Towards a Human-Computer Collaborative Scientific Paper Lifecycle: A Pilot Study and Hands-On Tutorial</i>	
Qingyun Wang, Carl Edwards, Heng Ji and Tom Hope	56
<i>Tutorial Proposal: Hallucination in Large Language Models</i>	
Vipula Rawte, Aman Chadha, Amit Sheth and Amitava Das	68
<i>Addressing Bias and Hallucination in Large Language Models</i>	
Nihar Ranjan Sahoo, Ashita Saxena, Kishan Maharaj, Arif A. Ahmad, Abhijit Mishra and Pushpak Bhattacharyya	73
<i>Knowledge-enhanced Response Generation in Dialogue Systems: Current Advancements and Emerging Horizons</i>	
Priyanshu Priya, Deeksha Varshney, Mauajama Firdaus and Asif Ekbal	80
