#### Preface

Massively Multilingual Language Models (MMLMs) like mBERT, XLMR and XY-LENT support around 100 languages of the world. Additionally, generative models like GPT-4 and BLOOM have shown impressive performance in English and a few high-resource languages. However, most existing multilingual NLP benchmarks reflect a handful of cultures and languages. The languages present in evaluation benchmarks are usually high-resource and largely belong to the Indo-European language family. By extension, the cultures represented in evaluation benchmarks are also largely reflective of Western society. This makes current evaluation unreliable and does not provide a full picture of the performance of MMLMs across the linguistic and cultural landscape. Although efforts are being made to create benchmarks that cover a larger variety of tasks, cultures, languages, and language families, it is clear that scaling-up multilingual and multi-cultural evaluation that can eventually lead to better models for all languages and cultures remains a formidable research challenge. This workshop is the second workshop in the SUMEval series, following a successful first workshop SUMEval 2022 co-located with AACL 2022. This year's workshop SUMEval-2, co-located with COLING 2025, has a wider scope focusing on multicultural evaluation in addition to multilingual evaluation.

### **Organizing Committee**

Hellina Hailu Nigatu, UC Berkeley

Monojit Choudhury, MBZUAI

Oana Ignat, Santa Clara University

Sebastian Ruder, Meta

Sunayana Sitaram, Microsoft

Vishrav Chaudhary, Meta

#### **Table of Contents**

The First Multilingual Model For The Detection of Suicide TextsRodolfo Joel Zevallos, Annika Marie Schoene and John E. Ortega1
CrossIn: An Efficient Instruction Tuning Approach for Cross-Lingual Knowledge Alignment Geyu Lin, Bin Wang, Zhengyuan Liu and Nancy F. Chen
Evaluating Dialect Robustness of Language Models via Conversation Understanding Dipankar Srirag, Nihar Ranjan Sahoo and Aditya Joshi
Cross-Lingual Document Recommendations with Transformer-Based Representations: Evaluating Mul- tilingual Models and Mapping Techniques
Tsegaye Misikir Tashu, Eduard-Raul Kontos, Matthia Sabatelli and Matias Valdenegro-Toro 39
<i>VRCP: Vocabulary Replacement Continued Pretraining for Efficient Multilingual Language Models</i> Yuta Nozaki, Dai Nakashima, Ryo Sato and Naoki Asaba

## **Tentative Conference Program**

0900 - 0915	Inaugural Remarks
0915 - 1015 Detection Algori	Invited Talk by Minsu Park: Cross-Cultural Mood Dynamics and thms
1015 - 1100	Coffee break
1100 - 1200 Multilingual Dat	Panel Discussion 1: Challenges of Collecting Culturally Grounded a for Training and Evaluation of NLP Systems
1200 - 1230	2-min Pitch for Papers (both archival and non-archival papers)
1230 - 1400	Lunch
1400 - 1530	Poster Session (both archival and non-archival)
1530 - 1600	Coffee break
1600 - 1715 Solutions. Unde	Panel Discussion 2: Diverse Cultures. Diverse Problems. Diverse erstanding the Nuanced Challenges and Opportunities in Working

1715 - 1730 Closing and Awards

with Diverse Cultures
