

Prompt: COT

Think step by step.

1. First, analyze and describe the relationship between the entities.
2. Then, use that information to generate a contextually rich sentence

You are an expert in the {domain} domain.

First entity: {entity1} of type {entity_type1}.

- {entity_type1} is defined as {entity_type1_description}.
- Mark this entity between <{entity_type1}> and </{entity_type1}> tags.

Second entity: {entity2} of type {entity_type2}.

- {entity_type2} is defined as {entity_type2_description}.
- Mark this entity between <{entity_type2}> and </{entity_type2}> tags.

...

Give the output between <start_sentence> and </end_sentence>.
