Responsible NLP Checklist

Paper title: Trustworthy Medical Question Answering: An Evaluation-Centric Survey
Authors: Yinuo Wang, Baiyang Wang, Robert Mercer, Frank Rudzicz, Sudipta Singha Roy, Pengjie Ren,
Zhumin Chen, Xindi Wang

How to read the checklist symbols: the authors responded 'yes' the authors responded 'no' the authors indicated that the question does not apply to their work the authors did not respond to the checkbox question For background on the checklist and guidance provided to the authors, see the Responsible NLP Checklist page at ACL Rolling Review.		
the authors responded 'no' the authors indicated that the question does not apply to their work the authors did not respond to the checkbox question For background on the checklist and guidance provided to the authors, see the Responsible NLP Checklist	How to read the checklist symbols:	
the authors indicated that the question does not apply to their work the authors did not respond to the checkbox question For background on the checklist and guidance provided to the authors, see the Responsible NLP Checklist	the authors responded 'yes'	
the authors did not respond to the checkbox question For background on the checklist and guidance provided to the authors, see the Responsible NLP Checklist	the authors responded 'no'	
For background on the checklist and guidance provided to the authors, see the Responsible NLP Checklist	the authors indicated that the question does not apply to their work	
	the authors did not respond to the checkbox question

✓ A. Questions mandatory for all submissions.

- A1. Did you describe the limitations of your work? *This paper has a Limitations section.*
- A2. Did you discuss any potential risks of your work? (left blank)

B. Did you use or create scientific artifacts? (e.g. code, datasets, models)

B1. Did you cite the creators of artifacts you used?

As a survey paper, the core of this work is to systematically review and analyze existing scientific artifacts created by other researchers. The authors did not create new artifacts (like new datasets or

artifacts created by other researchers. The authors did not create new artifacts (like new datasets or models) but extensively used existing ones for their analysis and compilation. The creators of all mentioned artifacts (including benchmarks, datasets, and models) are meticulously cited throughout the paper. This is most clearly demonstrated in Section 4, "Benchmarks and Tools for Trustworthy Medical QA," which is entirely dedicated to discussing these artifacts and their corresponding citations. Furthermore, Figure 1 and Table 1 explicitly list numerous benchmarks and link them to their original creators via citations, which are detailed in the "References" section.

- B2. Did you discuss the license or terms for use and/or distribution of any artifacts? (left blank)
- B3. Did you discuss if your use of existing artifact(s) was consistent with their intended use, provided that it was specified? For the artifacts you create, do you specify intended use and whether that is compatible with the original access conditions (in particular, derivatives of data accessed for research purposes should not be used outside of research contexts)? (*left blank*)
- B4. Did you discuss the steps taken to check whether the data that was collected/used contains any information that names or uniquely identifies individual people or offensive content, and the steps taken to protect/anonymize it?

 (left blank)
- B5. Did you provide documentation of the artifacts, e.g., coverage of domains, languages, and linguistic phenomena, demographic groups represented, etc.? (*left blank*)

N/A	B6. Did you report relevant statistics like the number of examples, details of train/test/dev splits, etc. for the data that you used/created? (<i>left blank</i>)
X	C. Did you run computational experiments?
N/A	C1. Did you report the number of parameters in the models used, the total computational budget (e.g., GPU hours), and computing infrastructure used? (<i>left blank</i>)
N/A	C2. Did you discuss the experimental setup, including hyperparameter search and best-found hyperparameter values? (<i>left blank</i>)
N/A	C3. Did you report descriptive statistics about your results (e.g., error bars around results, summary statistics from sets of experiments), and is it transparent whether you are reporting the max, mean, etc. or just a single run? (<i>left blank</i>)
N/A	C4. If you used existing packages (e.g., for preprocessing, for normalization, or for evaluation, such as NLTK, SpaCy, ROUGE, etc.), did you report the implementation, model, and parameter settings used? (<i>left blank</i>)
X	D. Did you use human annotators (e.g., crowdworkers) or research with human subjects?
_	D. Did you use human annotators (e.g., crowdworkers) or research with human subjects? D1. Did you report the full text of instructions given to participants, including e.g., screenshots, disclaimers of any risks to participants or annotators, etc.? (<i>left blank</i>)
N/A	D1. Did you report the full text of instructions given to participants, including e.g., screenshots, disclaimers of any risks to participants or annotators, etc.?
N/A	D1. Did you report the full text of instructions given to participants, including e.g., screenshots, disclaimers of any risks to participants or annotators, etc.? (<i>left blank</i>) D2. Did you report information about how you recruited (e.g., crowdsourcing platform, students) and paid participants, and discuss if such payment is adequate given the participants' demographic (e.g., country of residence)?
N/A N/A	 D1. Did you report the full text of instructions given to participants, including e.g., screenshots, disclaimers of any risks to participants or annotators, etc.? (<i>left blank</i>) D2. Did you report information about how you recruited (e.g., crowdsourcing platform, students) and paid participants, and discuss if such payment is adequate given the participants' demographic (e.g., country of residence)? (<i>left blank</i>) D3. Did you discuss whether and how consent was obtained from people whose data you're using/curating (e.g., did your instructions explain how the data would be used)?
N/A N/A N/A	 D1. Did you report the full text of instructions given to participants, including e.g., screenshots, disclaimers of any risks to participants or annotators, etc.? (<i>left blank</i>) D2. Did you report information about how you recruited (e.g., crowdsourcing platform, students) and paid participants, and discuss if such payment is adequate given the participants' demographic (e.g., country of residence)? (<i>left blank</i>) D3. Did you discuss whether and how consent was obtained from people whose data you're using/curating (e.g., did your instructions explain how the data would be used)? (<i>left blank</i>) D4. Was the data collection protocol approved (or determined exempt) by an ethics review board?

🔀 E1. If you used AI assistants, did you include information about their use?
